

Data Analytics

Company Name [Accenture](#) Company Location Gurgaon, Haryana, India

Job Location: Gurugram

Qualifications: Graduate

Years of Experience: 7-8 years

Job Summary

You will be aligned with our Insights & Intelligence vertical and help us generate insights by leveraging different analytics tools and techniques to deliver value to our clients. You will also help us apply your expertise in building world class solutions, conquering the business problems, addressing technical challenges using AI Platforms and technologies. You will be required to utilize the existing frameworks, standards, patterns to create architectural foundation and services necessary for AI applications that scale from multi-user to enterprise class and demonstrate self as an expert by actively blogging, publishing research papers and creating awareness in this emerging area.

You will be working as a part of Predictive Analytics & Modeling team which encompasses a variety of statistical techniques from data mining, predictive modelling, and machine learning, that analyze current and historical facts to make predictions about future or otherwise unknown events.

You will be primarily using Python Programming Language to help build multiple programming paradigms including procedural, object-oriented and functional programming. You will have to write logical code for different projects and take a constructive and object orientated approach.

Good to have skills: Microsoft Power BI, Python Programming Language, Ability to solve problems

Roles and Responsibilities

In this role you are required to do analysis and solving of moderately complex problems. May create new solutions, leveraging and, where needed, adapting existing methods and procedures. The person would require understanding of the strategic direction set by senior management as it relates to team goals. Primary upward interaction is with direct supervisor. May interact with peers and/or management levels at a client and/or within Accenture. Guidance would be provided when determining methods and procedures on new assignments. Decisions made by you will often impact the team in which they reside. Individual would manage small teams and/or work efforts (if in an individual contributor role) at a client or within Accenture. Please note that this role may require you to work in rotational shifts.

Accenture is an equal opportunities employer and welcomes applications from all sections of society and does not discriminate on grounds of race, religion or belief, ethnic or national origin, disability, age, citizenship, marital, domestic or civil partnership status, sexual orientation, gender identity, or any other basis as protected by applicable law.
